

Portable Building Delivery

Buying an in-stock Building

- Our delivery team is committed to having a time available to deliver your building within 5 business days from the time the order is placed. (weather permitting.)
- If the time available doesn't work with your schedule, we will do our best to get you another date as soon as the truck is in the area.

Ordering a Custom Built Building

- Designing and ordering a building is exciting and our building team takes that seriously.
- Our Team specializes in building you a high quality building that will last you for years to come but will take some time to build.
- Specialty items will take more time to get from our supplier due to the ordering and shipping process.

Delivery Scheduling

- We Deliver Monday - Friday and give our driver the weekend off to enjoy with family.
- We try to give you a day or 2 notice of an available time frame for delivery. In order for us to give you the best price we can, we have to keep our truck full and that means multiple deliveries with most loads.
- We do our best to fit your schedule. With multiple daily deliveries, an exact time is hard to predict.

If you cannot work with the times offered and a special delivery is needed just for your building, you could be subject to an additional fee of **\$250.00**

Delivery Preparation

- Ensure that the area is cleared (including all dog feces) and all tree branches are trimmed, giving a clear path so the building can be delivered without damage.
- Site checks are available if you're unsure (Our delivery team has a lot of experience and can give good recommendations if you can send pictures.)
- Have the recommended type and amount of concrete blocks close to the building site.
- Make sure to have a method of payment ready for any remaining balance that will be due after delivery. Cash or check is preferred; all card transactions will have a 3% charge added.

Delivery Day

1. The Driver will call/text when enroute with your building and give you an ETA.
2. Upon arrival, he will evaluate the building site and ensue a plan to safely place your building. (Our driver is a pro at what he does, so stand back and enjoy the process. Its fun to watch.)
3. You will be ask if the building is in the correct position before the driver starts leveling the building.
4. After the building is leveled, our driver will do a final inspection making sure all doors and windows function properly.
5. Once the building is set and everything is working properly, you will be given a key to your new building and any remaining balance will be due. Please Remit Payment to the driver unless other arrangements are made.

Rent-to-Own Contracted Building

After the delivery team has installed the building and everything is satisfactory, we will submit the contract to the RTO company for processing.
Within 2 business days you should receive a welcome call from the RTO company; payment/auto pay can be set up at that time.
RTO building rental payments are not due until one month after delivery.

Congratulations on Your Building

Specialize delivery truck and trailer

Our track machine allows us to safely maneuver your buildings into place with minimal damage to your yard

***4" Solid Blocks are essential as a base when setting a building on any surface besides concrete.
8" concrete cinder blocks can be stacked on top of a 4" solid concrete block if more elevation is need.***

A Concrete or Compact Gravel Base is recommended to prevent settling as well as creating a moisture and pest free environment under your building
